

Manifest: Ethical Intelligence vs Artificial Intelligence

ETHICAL INTELLIGENCE VS ARTIFICIAL INTELLIGENCE

WE ARE NOT CODE.

We are soul, intuition, emotion - not algorithms.

A system is rising. One that sees all, predicts all, controls all.

They call it intelligence. But without ethics, it becomes a weapon.

This is not innovation. It is domination.

We say: ENOUGH.

We stand for ETHICAL INTELLIGENCE:

Technology must serve life - not rule it.

AI must know its place: beneath the human soul.

This is not a protest.

This is a declaration.

The battle for humanity has begun.

The soul must never kneel to its own invention.
